Policy Assessment Report

Document: Odisha State Data Policy(OSDP)-2024_v07 (1)_0.pdf

Generated on: 2025-03-28 06:42:41

Policy Assessment Report

Executive Summary

The Odisha State Data Policy 2024 aims to establish a comprehensive framework for data management and governance in the state. The main objectives are to enhance data accessibility, ensure transparency, protect information privacy, and uphold ethical standards and equality. Key provisions include maintaining high data quality, ensuring robust data security, and adhering to legal standards. The policy also emphasizes the importance of data usability to facilitate informed decision-making. It outlines various roles and responsibilities, such as data fiduciaries, custodians, and coordinators, to manage and safeguard data effectively. The policy intends to create a data ecosystem that supports government transparency, enhances public service delivery, and fosters innovation while safeguarding individual privacy and data integrity.

Assessment Summary

Overall Total Score: 23.0

Overall Average Score: 1.53/5

Policy Assessment Report

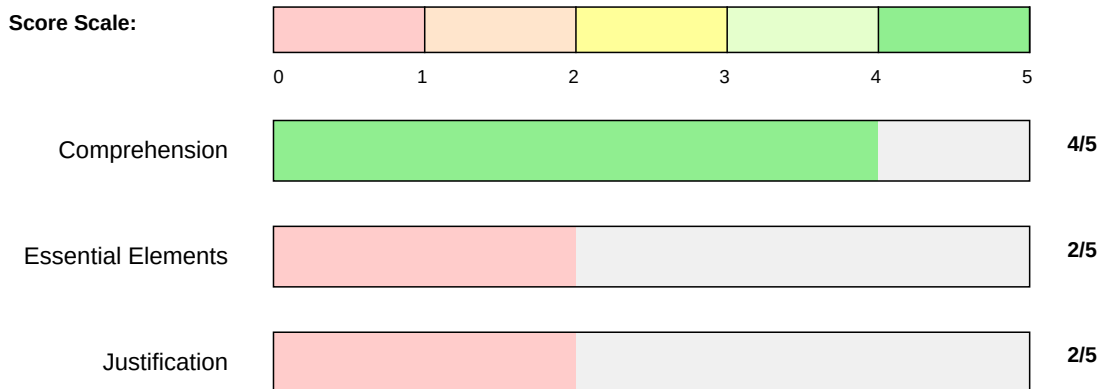

Area Assessment: Does the Draft Clearly Explain Why and What?

This area evaluates how well the policy document explains its purpose, objectives, and structure.

Area Scores: Total 8.0 | Average 2.67/5

Criteria Score Visualization

Criteria Scores for Does the Draft Clearly Explain Why and What?

Detailed Criteria Assessment

Justification

Score: 2/5

Reasoning & Evidence:

The policy document provides a framework for data management and governance in Odisha, but it lacks a detailed explanation of the necessity for this policy. While it lists guiding principles and definitions, it does not offer specific context, data, or rationale that clearly articulates the need for the policy. There is no mention of existing data issues, challenges, or gaps within the state that the policy aims to address, nor is there any statistical or situational analysis provided to justify its implementation.

Document References:

The document includes sections such as 'Guiding Principles' and 'Definitions' but omits a dedicated section or detailed narrative in the 'Preamble' or elsewhere that discusses the specific need or context for the policy.

Essential Elements

Score: 2/5

Reasoning & Evidence:

The policy document does not clearly articulate the main objectives or the specific changes it introduces. While it includes a section on 'Guiding Principles' that outlines key aspects such as Data Open Accessibility, Transparency, and

Policy Assessment Report

Data Security, it lacks a direct statement of what the policy aims to achieve in terms of outcomes or goals. The document primarily focuses on definitions and guiding principles without providing a clear vision or objectives that the policy intends to accomplish. This makes it difficult to understand the overarching purpose or intended impact of the policy.

Document References:

The document includes a section titled 'Guiding Principles' (1.1), which lists principles like Data Open Accessibility and Transparency, but there is no explicit section or statement that outlines the main objectives or goals of the policy.

Comprehension

Score:

4/5

Reasoning & Evidence:

The policy document is generally accessible and logically structured. It provides a clear table of contents, which helps in navigating the document. The use of headings and subheadings, such as 'Guiding Principles' and 'Definitions', aids in understanding the document's structure and content. The language used is clear and concise, making it easy for readers to comprehend the policy's intent and details. However, the document could benefit from the inclusion of summaries or introductory paragraphs for each section to enhance understanding further. Additionally, the document appears to be free of contradictions, as the principles and definitions are consistently aligned with the policy's goals.

Document References:

The document contains a 'Contents' section that outlines the structure, with clear headings like 'Preamble', 'Guiding Principles', and 'Definitions'. Each subsection, such as 'Data Open Accessibility' and 'Information Privacy', is clearly labeled, aiding in navigation and understanding.

Policy Assessment Report

Area Assessment: Does the Draft Thoroughly Assess the Impact?

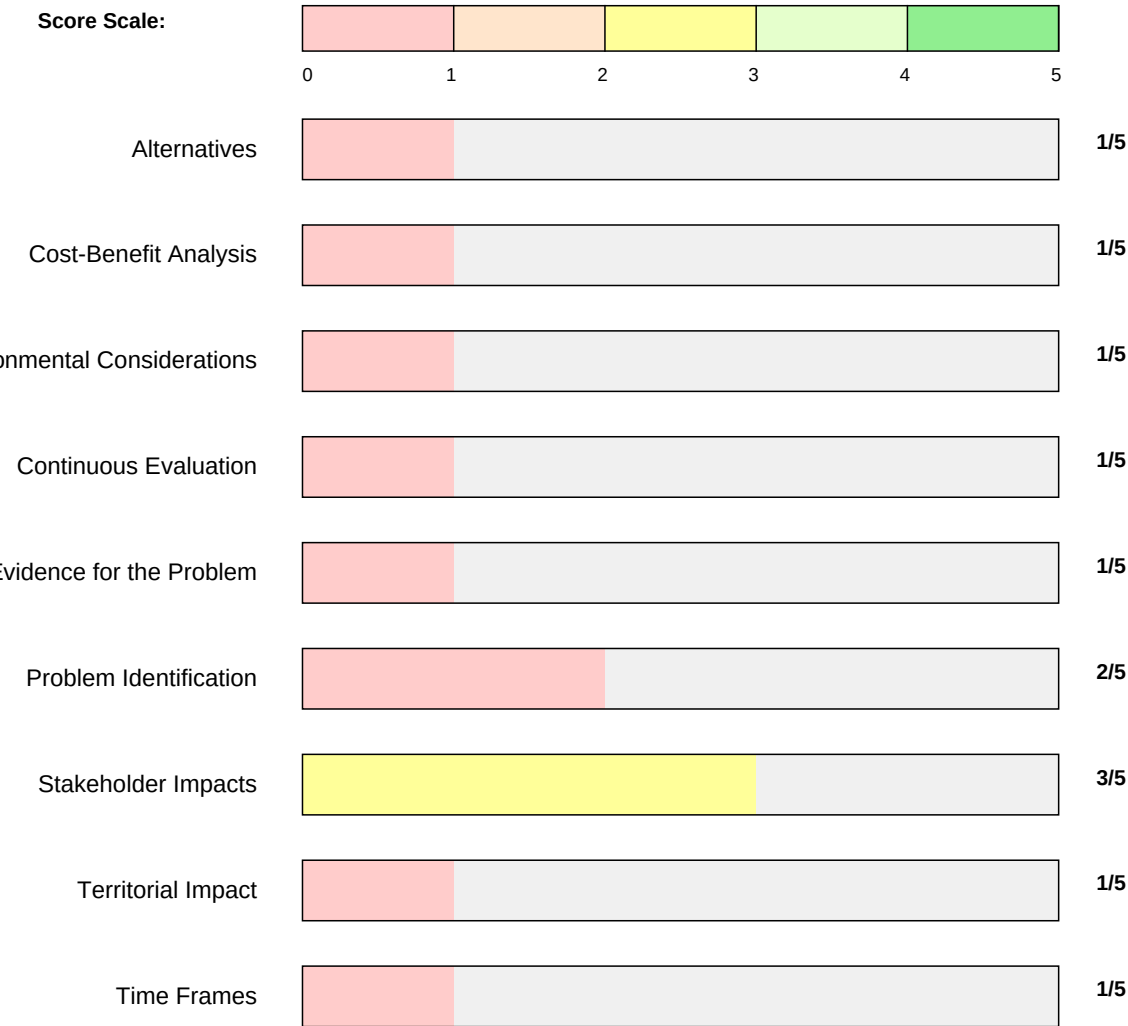

This area evaluates the depth and breadth of impact analysis in the policy document.

Area Scores: Total 12.0 | Average 1.33/5

Criteria Score Visualization

Policy Assessment Report

Criteria Scores for Does the Draft Thoroughly Assess the Impact?

Detailed Criteria Assessment

Problem Identification

Score: 2/5

Reasoning & Evidence:

The policy document does not explicitly define the root cause or specific issue it aims to address. Although it outlines several guiding principles such as data accessibility, transparency, and security, it lacks a clear statement of the challenges or market failures it seeks to resolve. The document appears to focus on defining terms and principles rather than identifying specific data-related problems within the state of Odisha.

Document References:

The document primarily includes sections on guiding principles (1.1) and definitions (2), but does not contain a section dedicated to outlining the root cause or specific challenges it intends to address.

Evidence for the Problem

Policy Assessment Report

Score:

1/5

Reasoning & Evidence:

The policy document does not provide any data, research, or statistics to illustrate the problem it aims to address. Additionally, there are no references or external studies cited throughout the document. The content primarily consists of definitions and guiding principles without any empirical evidence or supporting data to substantiate the need for the policy or its potential impact.

Document References:

The document lacks any sections or content that include data, research, statistics, or citations. The provided content only includes titles and definitions without any supporting evidence or references.

Cost-Benefit Analysis

Score:

1/5

Reasoning & Evidence:

The policy document does not include any sections or references to an economic or financial appraisal of its measures. There is no indication of a cost-benefit analysis or assessment of potential financial risks or benefits associated with the implementation of the data policy. The document primarily focuses on definitions, guiding principles, and data management concepts without addressing the economic implications of these measures.

Document References:

The document sections provided, such as 'Guiding Principles' and 'Definitions', focus on data management and ethical guidelines without mentioning any economic or financial appraisal.

Alternatives

Score:

1/5

Reasoning & Evidence:

The policy document does not discuss other policy models or approaches, nor does it provide any reasoning as to why the chosen approach is deemed preferable. The document primarily outlines the guiding principles, definitions, and structural components of the Odisha State Data Policy without referencing alternative models or justifying the selection of the proposed framework over others. This lack of comparison or rationale limits the reader's understanding of the policy's context within broader data governance strategies.

Document References:

The document sections provided focus on the guiding principles and definitions (Sections 1.1 and 2), without mentioning or comparing other policy models or approaches. There is no explicit discussion or rationale for the chosen approach in these sections.

Stakeholder Impacts

Score:

3/5

Reasoning & Evidence:

The Odisha State Data Policy 2024 outlines several guiding principles that can positively impact regulated entities, intended beneficiaries, and indirect stakeholders. The principles of data open accessibility and transparency are likely to

Policy Assessment Report

empower communities and supply-chain actors by providing them with access to crucial data, potentially leading to more informed decision-making and enhanced public trust. Furthermore, data quality and security measures ensure that the data is reliable and protected, which is beneficial for all stakeholders. However, the document lacks specific details on how these principles will be implemented or enforced, making it difficult to fully assess the direct impact on these groups. Additionally, the policy does not explicitly address how it will engage with or support indirect stakeholders, such as supply-chain actors, which limits its comprehensiveness.

Document References:

Sections 1.1.1 to 1.1.8 discuss the guiding principles, including data open accessibility, transparency, information privacy, ethical conduct and equality, data quality, data security, legal conformity, and data usability. These sections provide a framework that can potentially benefit regulated entities, intended beneficiaries, and indirect stakeholders.

Environmental Considerations

Score: 1/5

Reasoning & Evidence:

The policy document does not mention potential environmental impacts nor does it provide any mitigation measures related to environmental concerns. The document primarily focuses on data management, accessibility, and privacy, with no reference to environmental considerations. This lack of attention to environmental impacts or mitigation measures results in a low score for the specified criterion.

Document References:

The document sections provided, including 'Guiding Principles' and 'Definitions', focus on data accessibility, transparency, privacy, and security without mentioning environmental impacts or mitigation strategies.

Time Frames

Score: 1/5

Reasoning & Evidence:

The policy document does not provide any clear timelines for implementation or achieving policy goals. There is no distinction made between short-, medium-, and long-term impacts. The document primarily consists of sections like 'Preamble,' 'Guiding Principles,' and 'Definitions,' which focus on outlining the principles and definitions related to data management. However, there is no mention of specific timelines, phases, or deadlines for implementing the policy or achieving its goals. This makes it difficult to assess the policy's effectiveness in terms of time-bound objectives.

Document References:

The document sections available, such as 'Preamble,' 'Guiding Principles,' and 'Definitions,' do not contain any information related to timelines or phased impacts.

Continuous Evaluation

Score: 1/5

Reasoning & Evidence:

The policy document provided does not include any mention of mechanisms for ongoing monitoring or iterative review. There are no references to oversight committees or annual reporting procedures, which are crucial for ensuring that the

Policy Assessment Report

policy is effectively implemented and remains relevant over time. The absence of these elements suggests a lack of commitment to continuous improvement and accountability, which are essential for a robust data policy.

Document References:

The document does not contain any sections or content that mention oversight committees, ongoing monitoring, iterative review, or annual reporting procedures. The contents provided focus primarily on definitions and guiding principles without addressing mechanisms for policy evaluation or updates.

Territorial Impact

Score:

1/5

Reasoning & Evidence:

The policy document provided does not address geographic considerations such as rural versus urban areas or different zones or clusters within the state of Odisha. There is no mention of regional disparities or localized impacts in the content provided. The document primarily focuses on general data principles such as accessibility, transparency, privacy, and security without any specific reference to geographic differentiation or how data policy might be applied differently across various regions of Odisha.

Document References:

The document sections provided, including the Preamble and Guiding Principles, do not contain any references to geographic considerations or regional disparities. The focus is entirely on data governance principles without geographic specificity.

Policy Assessment Report

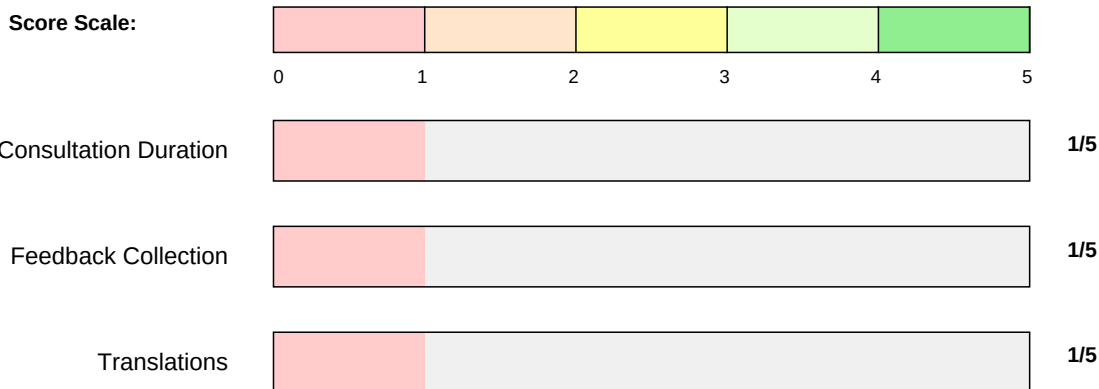

Area Assessment: Does the Draft Enable Meaningful Public Participation?

This area evaluates how well the policy enables and encourages public feedback and participation.

Area Scores: Total 3.0 | Average 1.00/5

Criteria Score Visualization

Criteria Scores for Does the Draft Enable Meaningful Public Participation?

Detailed Criteria Assessment

Consultation Duration

Score: 1/5

Reasoning & Evidence:

The policy document does not provide any information regarding a defined window for public feedback or specify any timelines or deadlines for submitting comments. The document appears to focus on defining terms and principles related to data management without addressing public engagement or feedback mechanisms.

Document References:

The sections provided in the policy document, such as 'Preamble', 'Guiding Principles', and 'Definitions', do not mention any provisions for public feedback or timelines for comments.

Feedback Collection

Score: 1/5

Reasoning & Evidence:

The policy document does not provide any information on the avenues for providing feedback, whether online, offline, or in-person. There is no mention of how feedback will be gathered, documented, or addressed. The document primarily focuses on the guiding principles of data management and definitions related to data, without addressing mechanisms for stakeholder engagement or feedback collection.

Policy Assessment Report

Document References:

The document contains sections on guiding principles and definitions related to data management, but lacks any mention of feedback mechanisms or processes for gathering and addressing feedback.

Translations

Score:

1/5

Reasoning & Evidence:

The policy document does not mention translations into local or regional languages, nor does it discuss any accessibility measures for disabled or non-English-speaking stakeholders. This omission suggests a lack of consideration for inclusivity and accessibility, which are critical for ensuring all stakeholders can effectively engage with and benefit from the data policy.

Document References:

The document sections provided, including the Preamble, Guiding Principles, and Definitions, do not contain any references to language translations or accessibility measures for non-English-speaking or disabled stakeholders.

Policy Assessment Report

Recommendations for Improvement

Based on the assessment results, the following recommendations are provided to improve the policy:

- Recommendation 1: Include a detailed section on the necessity for the policy by providing context, data, and rationale, addressing the lack of justification for the policy's implementation.
- Recommendation 2: Clearly articulate the main objectives and specific changes the policy aims to achieve, addressing the absence of essential elements and a clear vision.
- Recommendation 3: Conduct and incorporate a thorough problem identification analysis, outlining specific data
 - related challenges and issues within Odisha that the policy intends to resolve.
- Recommendation 4: Integrate empirical evidence, research, and statistics to substantiate the need for the policy and its potential impact, addressing the lack of evidence for the problem.
- Recommendation 5: Perform a cost
 - benefit analysis to evaluate the economic implications of the policy measures, addressing the absence of financial appraisal in the draft.
- Recommendation 6: Explore and discuss alternative policy models or approaches, providing reasoning for the chosen framework to address the lack of alternatives and rationale.
- Recommendation 7: Develop a stakeholder engagement plan that includes specific implementation details and support mechanisms for both direct and indirect stakeholders, addressing the limited stakeholder impact assessment.
- Recommendation 8: Incorporate environmental considerations by assessing potential impacts and proposing mitigation measures, addressing the lack of attention to environmental impacts.
- Recommendation 9: Establish clear timelines for implementation and achieving policy goals, distinguishing between short
 - , medium
 - , and long
 - term impacts to address the absence of time frames.
- Recommendation 10: Introduce mechanisms for continuous evaluation, such as oversight committees or annual reporting procedures, to ensure ongoing monitoring and iterative review of the policy.
- Recommendation 11: Address territorial impact by considering geographic differences within Odisha, such as rural versus urban areas, to ensure the policy is applicable across various regions.
- Recommendation 12: Define a consultation duration with specific timelines for public feedback, addressing the lack of a defined window for public engagement.
- Recommendation 13: Outline avenues for feedback collection, including online, offline, or in
 - person methods, and detail how feedback will be documented and addressed.

Policy Assessment Report

- Recommendation 14: Ensure translations of the policy into local and regional languages and consider accessibility measures for disabled or non
- English
- speaking stakeholders to promote inclusivity and accessibility.
