Policy Assessment Report

Executive Summary

The Odisha State Data Policy 2024 aims to establish a comprehensive framework for managing data within the state. The main objectives of the policy are to enhance data accessibility, ensure transparency, protect privacy, promote ethical conduct, maintain data quality and security, ensure legal compliance, and improve data usability.

Key provisions of the policy include:

1. **Data Open Accessibility**: Encouraging open access to data while ensuring it is available to stakeholders in a user-friendly manner.
2. **Transparency**: Promoting openness in data management and sharing processes.
3. **Information Privacy**: Safeguarding personal and sensitive data to protect individual privacy.
4. **Ethical Conduct and Equality**: Ensuring data practices are fair and equitable.
5. **Data Quality**: Maintaining high standards of data accuracy and reliability.
6. **Data Security**: Implementing measures to protect data from unauthorized access and breaches.
7. **Legal Conformity**: Ensuring all data practices comply with existing laws and regulations.
8. **Data Usability**: Making data easily understandable and usable for decision-making processes.

The policy is intended to create a robust data ecosystem that supports informed decision-making, fosters innovation, and drives socio-economic development in Odisha.

Assessment Summary

Overall Total Score: 22.0

Overall Average Score: 1.47/5

Area Scores:

Assessment Area	Total	Average

Does the Draft Enable Meaningful Public Particip...	3.0	1.00/5

Policy Assessment Report

Area Assessment: Does the Draft Clearly Explain Why and What?

This area evaluates how well the policy document explains its purpose, objectives, and structure.

Area Scores: Total 8.0 | Average 2.67/5

Criteria Score Visualization

Criteria Scores for Does the Draft Clearly Explain Why and What?

Detailed Criteria Assessment

Justification

Score: 2/5

Reasoning & Evidence:

The policy document lacks a comprehensive section that explicitly addresses the need for the policy. While it outlines guiding principles and definitions related to data management, it does not provide specific context, data, or rationale explaining why the policy is necessary. There is no mention of existing issues, challenges, or objectives that the policy aims to address, which are crucial for establishing a well-founded need for the policy.

Document References:

The document includes sections such as '1. Preamble' and '1.1 Guiding Principles' but does not contain any section that explicitly discusses the necessity or rationale for the policy.

Essential Elements

Score: 2/5

Reasoning & Evidence:

The policy document provides a list of guiding principles and definitions related to data management, such as data

Policy Assessment Report

accessibility, transparency, privacy, and security. However, it lacks a clear statement of the main objectives or specific changes the policy intends to introduce. While the guiding principles suggest a focus on improving data management practices, the document does not explicitly outline what the policy aims to achieve in terms of measurable outcomes or specific provisions. This makes it difficult to understand the intended impact or changes the policy seeks to implement.

Document References:

The document includes guiding principles such as Data Open Accessibility, Transparency, Information Privacy, and others listed under section 1.1. However, there is no section or content that explicitly states the main objectives or specific goals of the policy.

Comprehension

Score:

4/5

Reasoning & Evidence:

The policy document is largely accessible and logically structured, with clear language and organization. The presence of a 'Contents' section at the beginning aids navigation, and the use of headings and sub-headings such as 'Preamble', 'Guiding Principles', and 'Definitions' helps in understanding the structure and flow of the document. The document also uses clear language, making it accessible to a wide audience. However, the document seems to be incomplete, as indicated by the abrupt end in the 'Sensitive Persona' section, which slightly detracts from its overall accessibility and logical flow. Furthermore, while the headings are clear, the document could benefit from summaries or introductory paragraphs for each major section to enhance understanding.

Document References:

Contents section, Guiding Principles (1.1), Definitions (2), and the abrupt end in section 2.17 'Sensitive Persona'.

Policy Assessment Report

Area Assessment: Does the Draft Thoroughly Assess the Impact?

This area evaluates the depth and breadth of impact analysis in the policy document.

Area Scores: Total 11.0 | Average 1.22/5

Criteria Score Visualization

Criteria Scores for Does the Draft Thoroughly Assess the Impact?

Detailed Criteria Assessment

Policy Assessment Report

Problem Identification

Score: 1/5

Reasoning & Evidence:

The policy document does not clearly define the root cause or specific issue it aims to address. There is an absence of any discussion regarding challenges or market failures that the policy intends to tackle. The document primarily focuses on listing guiding principles, definitions, and terminologies related to data management without providing context or justification for the need for such a policy. This lack of clarity on the underlying issues makes it difficult to understand the purpose and necessity of the policy.

Document References:

The document sections provided, including 'Preamble' and 'Guiding Principles', do not mention any specific issues, challenges, or market failures. The focus is on principles like 'Data Open Accessibility', 'Transparency', and 'Data Security', without explaining the context or problems these principles are meant to address.

Evidence for the Problem

Score: 1/5

Reasoning & Evidence:

The policy document does not provide any data, research, or statistics to illustrate the problem it addresses. There are no references or citations of external studies or reports that could support the policy's objectives or provide context for its necessity. The document primarily consists of definitions and guiding principles without any empirical evidence or external references.

Document References:

The document includes sections such as 'Preamble', 'Guiding Principles', and 'Definitions', but none of these sections contain data, research, or citations to external studies. The content is focused on definitions and principles without empirical support.

Cost-Benefit Analysis

Score: 1/5

Reasoning & Evidence:

The policy document, 'ODISHA STATE DATA POLICY - 2024,' does not include any sections or content that specifically address an economic or financial appraisal of its measures. There is no analysis of potential benefits against costs or risks associated with the implementation of the policy. The document primarily focuses on definitions, guiding principles, and terms related to data management, without delving into the economic implications or financial assessments of the policy's measures.

Document References:

The document lacks sections that discuss economic or financial appraisal. The content is centered around data management principles, such as Data Open Accessibility, Transparency, Information Privacy, and Data Security, without any mention of cost-benefit analysis or risk assessment.

Alternatives

Policy Assessment Report

Score:

1/5

Reasoning & Evidence:

The policy document does not discuss other policy models or approaches, nor does it provide any reasoning for why the chosen approach is deemed preferable. The document appears to focus solely on defining terms and outlining the guiding principles for data management without referencing alternative models or justifying the specific approach adopted by the Odisha State Data Policy.

Document References:

The document sections provided, such as 'Guiding Principles' and 'Definitions', do not mention any other policy models or approaches. There is no discussion or comparison with other data policies, nor is there any explanation of why the chosen approach is preferable.

Stakeholder Impacts

Score:

3/5

Reasoning & Evidence:

The Odisha State Data Policy 2024 outlines several guiding principles such as data open accessibility, transparency, and data usability, which suggest a positive impact on regulated entities and intended beneficiaries by promoting open access to data and ensuring transparency. This can facilitate better decision-making and innovation among stakeholders. However, the document lacks specific details on how these principles will be implemented or how they will directly affect communities or supply-chain actors. There is also limited information on the support mechanisms for indirect stakeholders, such as training or resources needed for effective data utilization. The policy mentions legal conformity and data security, which are crucial for protecting the interests of all stakeholders, but again, lacks detailed strategies or frameworks for execution. Overall, while the policy sets a promising foundation, it falls short in providing comprehensive strategies for engagement and impact on indirect stakeholders.

Document References:

Sections 1.1.1 to 1.1.8 cover the guiding principles that highlight data accessibility, transparency, and security, which are relevant to the evaluation criterion.

Environmental Considerations

Score:

1/5

Reasoning & Evidence:

The policy document provided is focused on data management and governance, specifically addressing aspects such as data accessibility, transparency, privacy, ethical conduct, quality, security, legal conformity, and usability. However, it does not mention potential environmental impacts or provide any mitigation measures related to environmental concerns. The document is centered around data policies and does not extend its scope to environmental considerations.

Document References:

The document primarily discusses data-related topics such as Data Open Accessibility, Transparency, Information Privacy, Ethical Conduct and Equality, Data Quality, Data Security, Legal Conformity, and Data Usability. There is no mention of environmental impacts or mitigation measures in any of these sections.

Policy Assessment Report

Time Frames

Score: 1/5

Reasoning & Evidence:

The policy document lacks any mention of timelines for implementation or achieving policy goals. It does not distinguish between short-, medium-, and long-term impacts. The document primarily focuses on defining terms and outlining guiding principles without providing a structured timeline or phases for implementation.

Document References:

The document sections provided, such as 'Guiding Principles' and 'Definitions', do not include any timelines or impact distinctions, and there is no section that specifically addresses implementation timelines or phases.

Continuous Evaluation

Score: 1/5

Reasoning & Evidence:

The policy document provided does not mention any mechanisms for ongoing monitoring or iterative review. There are no references to oversight committees or annual reporting procedures within the content available. The document primarily outlines guiding principles and definitions related to data policy but lacks any specific sections on how the policy will be monitored, reviewed, or updated over time.

Document References:

The document sections provided include 'Guiding Principles' and 'Definitions,' but there are no sections or content related to monitoring or review mechanisms.

Territorial Impact

Score: 1/5

Reasoning & Evidence:

The policy document provided lacks any mention or consideration of geographic factors such as rural versus urban areas, different zones, or clusters. There is no indication that regional disparities or localized impacts are taken into account in the policy. The document focuses on general principles of data management such as accessibility, transparency, and security, but does not address how these principles may be applied differently across various geographic regions within Odisha. Without specific reference to geographic considerations, it is difficult to assess how the policy might address or mitigate regional disparities.

Document References:

The document primarily outlines guiding principles and definitions related to data management (Sections 1.1 and 2), without any mention of geographic considerations or regional disparities.

Policy Assessment Report

Area Assessment: Does the Draft Enable Meaningful Public Participation?

This area evaluates how well the policy enables and encourages public feedback and participation.

Area Scores: Total 3.0 | Average 1.00/5

Criteria Score Visualization

Criteria Scores for Does the Draft Enable Meaningful Public Participation?

Detailed Criteria Assessment

Consultation Duration

Score: 1/5

Reasoning & Evidence:

The policy document does not provide any information regarding a defined window for public feedback. There are no timelines or deadlines specified for submitting comments on the policy. This lack of clarity and absence of a structured feedback mechanism makes it difficult for the public to engage with the policy-making process effectively.

Document References:

The document sections provided, including the Table of Contents and the initial parts of the policy, do not mention any timelines or processes for public feedback.

Feedback Collection

Score: 1/5

Reasoning & Evidence:

The policy document does not provide any specific details about avenues for providing feedback, whether online, offline, or in-person. Additionally, there is no mention of how feedback will be gathered, documented, or addressed. The

Policy Assessment Report

document primarily focuses on defining terms and outlining guiding principles related to data management, such as data accessibility, transparency, and security, but it lacks any mention of stakeholder engagement or feedback mechanisms.

Document References:

The document includes sections on Guiding Principles and Definitions, but none of these sections address feedback mechanisms or stakeholder engagement processes.

Translations

Score:

1/5

Reasoning & Evidence:

The policy document does not mention translations into local or regional languages, nor does it discuss accessibility measures for disabled or non-English-speaking stakeholders. The document focuses on data principles such as accessibility, transparency, privacy, and security, but it does not address the specific needs of non-English-speaking or disabled individuals who might require alternative formats or translations to access the data effectively.

Document References:

The policy document's sections, such as '1.1 Guiding Principles' and '2 Definitions', do not include any mention of language translations or accessibility measures for disabled or non-English-speaking stakeholders.

Policy Assessment Report

Recommendations for Improvement

Based on the assessment results, the following recommendations are provided to improve the policy:

- Recommendation 1: Include a comprehensive section that outlines the current challenges, gaps, and issues in data management and usage within Odisha to address the lack of justification. This should include specific examples and data to illustrate the necessity of the Odisha State Data Policy 2024.
- Recommendation 2: Develop a clear and concise statement of the main objectives and specific outcomes the policy aims to achieve to address the absence of essential elements. This should outline the intended impact of the policy on data management practices in the state.
- Recommendation 3: Incorporate case studies or examples from other regions or countries that have successfully implemented similar data policies to provide context and justification for the guiding principles of data accessibility, transparency, and security.
- Recommendation 4: Add a section that explains the rationale behind each guiding principle, including data accessibility, transparency, and privacy, to enhance the understanding of why these principles are critical for the policy.
- Recommendation 5: Include a detailed explanation of the expected benefits and improvements that the policy will bring to data management and governance in Odisha, addressing the need for a clear justification.
- Recommendation 6: Provide a summary of stakeholder consultations or expert opinions that were considered in the policy development process to strengthen the justification and context for the policy's necessity.
- Recommendation 7: Clearly define and differentiate between the guiding principles and the specific objectives or changes the policy intends to introduce to improve clarity and focus on the policy's intended outcomes.
